Maintenance Market

THE PLATFORM

Edge-AI sensors with ML models run directly on factory equipment, streaming real-time vibration, temperature, and acoustic data.

Failure predicted up to **72 hours early-offline**, no IT required

Why Now: India's Edge AI Moment

MSME digital adoption

PLI manufacturing GDP

Cheap IoT deployment

We turn machines into self-monitoring systems.

From Factory Floor to Economic Force

FEASIBILITY: IT CAN BE BUILT TODAY

- INFRA: JioThings 4G/5G coverage in 90% of industrial zones; BSNL LPWAN live in 12 states.
- TALENT: IIT Madras Manufacturing AI Lab, CSIR-CMERI pilots already running on MSME clusters.
- REGULATION: BIS IoT certification path cleared 2024; DPIIT sandbox-eligible startup category
- PILOT SIGNAL: Tata Steel deployed edge-AI vibration monitoring (2023) → 31% downtime reduction

TIERED SAAS + HARDWARE LEASE

STARTER	- ₹2,499/mon	: 1 machine , 2 sensors , alerts
GROWTH	- ₹8,999/mon	: Up to 10 machines , dashboard , API
ENTERPRISE	- Custom	: Full plant , ERP integration , SLA

Hardware sensors leased at ₹500/mon — Zero CapEx for MSME buyer. Break-even per unit: ~14 months.
